## ABOUT ME

My name is Alex Bussey and I have been working with web technologies for about 30 years. I have a passion for creating innovative and user-friendly web applications that solve real-world problems. I am always eager to learn new technologies and stay up-to-date with the latest trends in the industry.

## EXPERIENCE

### 2023 - Present     **SOFTWARE ENGINEER**

PagerDuty - Remote

Contributed to the Jeli product for six months post-acquisition by PagerDuty, ensuring seamless integration. Collaborated with a team to migrate legacy frontends from Elixir and Backbone to React and TypeScript. Actively participated in enhancing the internal design system and component library to improve user experience.

### 2022 - 2023     **SOFTWARE ENGINEER**

Jeli - Remote

Contributed to the frontend development of Jeli's product, enhancing user experience and functionality. Played a key role in modernizing and standardizing the technology stack used across the company. Collaborated closely with a small team of around 20 employees, fostering a strong team dynamic in a startup environment.

### 2022     **SENIOR SOFTWARE ENGINEER**

CommonBond - Remote

Spearheaded the integration of a new authentication flow across various applications, enhancing user security and experience. Collaborated on the rebranding of the marketing site, aligning it with the company's vision and improving user engagement. Utilized frontend technologies to deliver high-quality, responsive designs that meet user needs and business objectives.

2015 - 2021

## SOFTWARE ENGINEER

JW Player - New York, NY

Started as a member of the support team but quickly transitioned to a software engineer role, where I worked in several different areas. These include working on the JavaScript-based video player, advertising plugins, platform interfaces and being part of a small team tasked with migrating the whole user-facing application from Angular to React.
